

Ocean Concrete Re-Opens Surrey Ready-Mix Plant

Ocean Concrete added a state-of-the-art 200+ meter per hour plant to its roster at its operating site in Surrey, BC. As part of Metro Vancouver operations, the plant will provide support to Ocean Concrete, [Rempel Bros. Concrete](#), and [Allied Ready Mix Concrete](#) customers.

The plant, which is located under the Pattullo Bridge in Surrey, is the site of a former seasonal fishing village shared by First Nations people from locations as far as Nanaimo, Lummi Washington, and Squamish.

In recognition of the site's history, Ocean Concrete, a division of [Lehigh Hanson Materials Limited](#) funded the commissioning of drums at the [Chuck Bailey Recreation Centre](#) by artist [Brandon Gabriel](#), and a permanent sculpture at the entrance to the plant by artists [Drew Atkins and Phyllis Atkins](#).

An art unveiling ceremony held on May 30, 2016 celebrated the history and significance of the First Nations community; the ceremony was a collaboration between the [Kwantlen First Nation](#), the [City of Surrey](#) and Ocean Concrete. We appreciate the symbolism captured by the art that incorporates and meshes historical significance of the land with current land use.
